Paulo Coelho

## PROJECTS

ZVOOK

Technovation Challenge by Iridescent

May 2018

Nur-Sultan

Worked with a team on a mobile application which helps people with disabled hearing to avoid dangerous situations in their daily routine. I was in charge of the programming part of the application, using the Android Studio development environment and Java programming language.

Online Act

School regulation system

September 2018

Aktobe

Implemented an online system for creating and keeping a database of school offense cases. I was an idea creator and developer of the back-end of the system on PHP and MySQL, which is realized in the school education environment.

Vacuum train

Small Academy of Sciences

May 2017

West Kazakhstan

Project for investigation of the working principle of Vacuum train with a further suggestion of integration into infrastructure. The technical part of working principle was the main working for me.
